Section 4: FIRST- AID MEASURES

4.1 DESCRIPTION OF THE FIRST AID MEASURE

Eye: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. If easy to do, remove contact lenses, if worn. If eye irritation persists: Get medical advice/attention.

Skin: If irritation occurs, flush skin with plenty of water. Remove contaminated clothing and shoes. Wash clothing before reuse. Call a physician if irritation develops and persists.

Inhalation: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical advice/attention if you feel unwell.

Ingestion: Not a normal route of exposure. If swallowed, do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical advice/attention.
4.2 MOST IMPORTANT SYMPTOMS AND EFFECTS, BOTH ACUTE AND DELAYED

Eye: Causes serious eye damage. Symptoms may include discomfort or pain, excess blinking and tear production, with possible redness and swelling.

Skin: Causes skin irritation. Wear gloves when handling product to avoid drying and mechanical abrasion of the skin. May cause sensitization by skin contact. Product becomes extremely alkaline when exposed to moisture, and can cause alkali burns and affect the mucous membranes.

Inhalation: Dust may cause respiratory tract irritation. Prolonged or repeated inhalation of respirable silica from this product can cause silicosis.

Ingestion: Not a normal route of exposure. May cause discomfort and/or distress, excess blinking, vomiting or may cause alkali burns.

4.3 INDICATION OF ANY IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENTS NEEDED

Note to Physicians: Symptoms may not appear immediately.
Specific Treatments: In case of accident or if you feel unwell, seek medical advice immediately (show the label or SDS where possible).

### 11.2 DELAYED, IMMEDIATE, AND CHRONIC EFFECTS OF SHORT- AND LONG-TERM EXPOSURE

#### Skin Corrosion/Irritation:
Causes skin irritation. Product becomes extremely alkaline when exposed to moisture, and can cause alkali burns and affect the mucous membranes. Caustic burns to skin occur if contact is prolonged.

#### Serious Eye Damage/Irritation:
Causes serious eye damage. Prolonged contact under moist conditions can cause caustic burns.

#### Respiratory Sensitization:
Not available.

#### Skin Sensitization:
May cause an allergic skin reaction. Product becomes extremely alkaline when exposed to moisture, and can cause alkali burns and affect the mucous membranes.

#### STOT-Single Exposure:
Dust may cause respiratory tract irritation. (Category 1)

#### Chronic Health Effects:
Not available.

#### Carcinogenicity:
Respirable dust may contain crystalline silica, known to cause cancer.

#### Germ Cell Mutagenicity:
Not available.

#### Reproductive Toxicity:
Not available.

#### Developmental:
Not available.

#### Teratogenicity:
Not available.

#### Embryotoxicity:
Not available.

#### Fertility:
Not available.

#### STOT-Repeated Exposure:
Causes damage to lungs through prolonged or repeated exposure. Respirable crystalline silica in the form of quartz or cristobalite from occupational sources is listed by the International Agency for
Research on Cancer (IARC) and National Toxicology Program (NTP) as a lung carcinogen. Prolonged exposure to respirable crystalline silica has been known to cause silicosis, a lung disease, which may be disabling. While there may be a factor of individual susceptibility to a given exposure to respirable silica dust, the risk of contracting silicosis and the severity of the disease is clearly related to the amount of dust exposure and the length of time (usually years) of exposure.
