

QUARRY STONE

What we all love about natural stone is the rustic look that comes with a surface created by Mother Nature. However, the problem with natural stone is the inconsistency and unevenness of the surface. Mutual Materials has created “stones” from reinforced concrete to provide the look of natural stone, yet give you the evenness in the surface to allow for ease-of-use.

These stones can be paired with risers to create stairs. By using a variety of mold shapes, repetition is avoided for a natural look. For a bench, place the stones on our 7" pedestals.

These stones come in two different textures. Quarry texture has a dimpled surface created to reflect a sandstone finish. Slate texture has slight ridges inspired by the real thing.
